

BODY WORN VEST LIVE STREAMING CCTV

LIVE IMAGES • LOCAL RECORDING • BI DIRECTIONAL AUDIO • GEO FENCING • PROTECTION OF LIFE & SAFETY
FOR FRONT LINE STAFF • EVIDENCE GATHERING • SITUATION AWARENESS • REMOTE SITUATION MANAGEMENT

GLOBAL LEADERS IN INTEGRATED SECURITY & FIRE PROTECTION

A Freedom of Information request to all police forces found that last year a total of 19,670 officers were assaulted on duty, one every 27 minutes.

TFS Group can provide dynamic cutting edge solutions for business and service sectors to ensure they keep safe their personnel, assets and reputation whilst they are on the move.

Providing real time situation awareness to managers and seniors, the power of which can change the course of events as they unfold.

Body Worn Cameras are already an accepted solution in many different areas, however the technology currently being used is to record locally onto a SD card, this solution has massive limitations.

Live streaming of the images can provide interaction between managers / superior officers to assist in decision making.

TYPICAL APPLICATIONS INCLUDE:

Police Force Personnel, Ambulance Personnel, Fire Brigade Personnel, Transport Network Personnel, MOD Personnel, Logistics Business Personnel, Manned Guarding Personnel, and many more...

The Met had the largest number of officer assaults in the past year with 1,493. Greater Manchester Police suffered 802 attacks and Thames Valley 560.

Given the size of its force, under 2,000 officers, Hertfordshire had a high number per officer: 451.

Body Worn Solutions have the following features:

- Live streaming and local recording of video images
- Ruggedised digital video recording and transmission system for mobile applications with 2 video inputs
- Interface for GPS receiver units for image-synchronous recording and transmission of position, direction and speed
- Long-term recording onto removable hard disk drive with adaptive multi-track management optimised for mobile applications
- Audio recording on integrated hard disk drive
- Manual or event-triggered connection for live video transmission from and to remote monitoring centres
- Display of vehicle position by means of graphic display within cartographic programmes
- Geo-Fencing, alarms on unusual vehicle location & behaviour

TFS Group can provide vehicle based CCTV solutions which can be streamed live via 3g or 4g through to a businesses security operating centre this information can be extremely helpful to the business in the following areas:

Provide Real Time information from front line personnel.

Provide real time situation awareness.

Provide real time GPS location.

Live Dial in.

Audio Communication.

All Events recorded both Locally & Remotely.

Biometrics Applied Solution

To complement the Body Worn Vest we can incorporate Facial Recognition Technology Solution, this provides the ability to automatically upload images of individuals and interrogate a national database, providing mobile identification, this solution is yet another significant benefit of Live Streaming of CCTV images compared to a camera with a SD card. .

Tailored Fire & Security Group are proud to be members of TAPA (Transport Asset Protection Agency) which gives us access to the latest information in relation to targeted crime in the logistics markets and the requirements / standards for security.
