

A photograph of the London skyline. The Gherkin building is the central focus, with its distinctive diamond-patterned glass facade. To its left is a dark, rectangular skyscraper. In the foreground, the ornate, classical architecture of the Bank of England is visible. The sky is a clear, pale blue.

GLOBAL LEADERS IN INTEGRATED SECURITY & FIRE PROTECTION

Online banking fraud rocketed by almost 50% last year, according to Financial Fraud Action UK (FFA UK) losses from these frauds rose from £40.9 million in 2013 to £60.4 million in 2014.

TFS Group are experts with a vast experience in financial security solutions, we can provide dynamic cutting edge solutions for commercial and investment banks to ensure that their assets and reputation are protected.

Banks and financial institutions face complex security requirements, including the need to provide physical security across geographically dispersed branches, ATMs, cash vaults, Trading Floors, and data centers, and to continually monitor their operations for fraud. Terrorism, criminal activities, cyber-attacks and other security threats, combined with new and more complex security challenges, are driving demand for innovative solutions that can enhance security to help anticipate, prepare, and respond to threats.

TFS Group can help address these challenges, as a leading global provider of video and situation intelligence solutions, we offer a portfolio of solutions to help today's financial institutions identify and proactively address security threats, vulnerabilities and improvements in fraudulent investigations.

Our comprehensive, end-to-end IP video solutions incorporate intelligent edge devices, embedded network video recorders (NVRs), IP cameras, integrated analytics, and powerful notification and response capabilities. They can help your financial services organisation go beyond recording to take a holistic, proactive approach to managing security, from capturing information inside and outside your facilities, to conducting investigations and monitoring the performance of video systems across your entire network.

They can also help you increase business efficiency and enhance customer service. Our Video and Situation Intelligence Solutions benefit from proven, robust technology and because our solutions are built on a scalable platform, they can deliver a lower total cost of ownership and greater ease of operation than proprietary systems.

TFS Group can bring a wealth of technology innovation and experience to the broad-reaching financial services industry through advanced security and enterprise intelligence technology, vertical-focused solutions and subject matter expertise.

The foreign exchange market is a global, 24-hour decentralised market with average turnover of over \$US5 trillion a day, Fraud has the potential to undermine confidence in the integrity of the foreign exchange market and disadvantage those that participate in the market without that inside information.

Integrated security solutions drives better and faster business decisions by collecting and analysing raw data from multiple sources and turning that data into action-oriented information. Comprehensive, timely and intelligent information empowers end-users to automate and improve the business decision-making processes. This results in increased security, reduced costs, enhanced productivity and greater profitability.

We can offer entry level, mid-range enterprise and large enterprise solutions. For example, a large scalable enterprise solution can provide:

- Identity management
- Access Control
- Digital video management
- Area access management
- 170,000+ Card holders
- 240+ access panels
- 16,000+ readers
- 600+ Video Recorders
- 24,000+ cameras
- Redundant servers located across the globe

DIGITAL VIDEO • ACCESS CONTROL • ID MANAGEMENT • VISITOR MANAGEMENT ASSET MANAGEMENT • BIOMETRICS / SMART CARDS • FIRE PROTECTION

Solution Benefits Commercial Banking:

Video Analytics to combat criminal and fraudulent activity—as well as evolving customer behavior and expectations for data confidentiality—can pose formidable challenges for financial institutions. This has led many institutions to rely on video surveillance systems to help reduce the costly effects of fraud while optimising safety. We can provide solutions to include face detection, license plate recognition, and a variety of surveillance analytics for use inside and outside financial and other facilities. Specifically designed to enhance the efficiency and effectiveness of security operations in corporate command, control and communications environments.

Voice biometrics to passively enroll and authenticate the identity of customers and detect fraudulent callers in contact centers. software can profile and recognize the unique vocal characteristics, or voiceprints of callers and match them against a database of voiceprints. This can enable contact centers to enhance fraud detection in inbound calls by verifying the identity of customers more quickly, easily, and securely than traditional authentication methods. It can also enable contact centers to detect known fraudster voices and take appropriate action, without disrupting the customer experience for legitimate callers.

Provide Real Time information to assist in the management of the business.

Reduce losses from fraud.

Reduce losses and disruption to business as a result.

Re-assurance to clients that their assets are held in the facility with the utmost of security.

The enterprise scalable solutions can bring about worldwide system integration and support.

Enterprise Video Management Software offers policy-based video distribution, networked video viewing, and investigation management to help security staff rapidly detect, act, and investigate security breaches and other threats. Automated video system health monitoring helps IT staff manage large, geographically distributed video operations and streamlines video system uptime to help ensure video availability.
